

# PIPELINING: INTRODUCTION

Mahdi Nazm Bojnordi

Assistant Professor

School of Computing

University of Utah

# Overview

- Announcement

  - ▣ TA hours

    - Thursdays 11:00-1:00 (Payman)

    - Tuesdays 9:30-11:30 (Krunal Jain)

- This lecture

  - ▣ Processing instructions

  - ▣ Single-cycle architecture

  - ▣ Reusing resources

  - ▣ Pipelined architecture

# Processing Instructions

- Every RISC instruction may require multiple processing steps

**Processor**

**Memory**

# Processing Instructions

- Every RISC instruction may require multiple processing steps

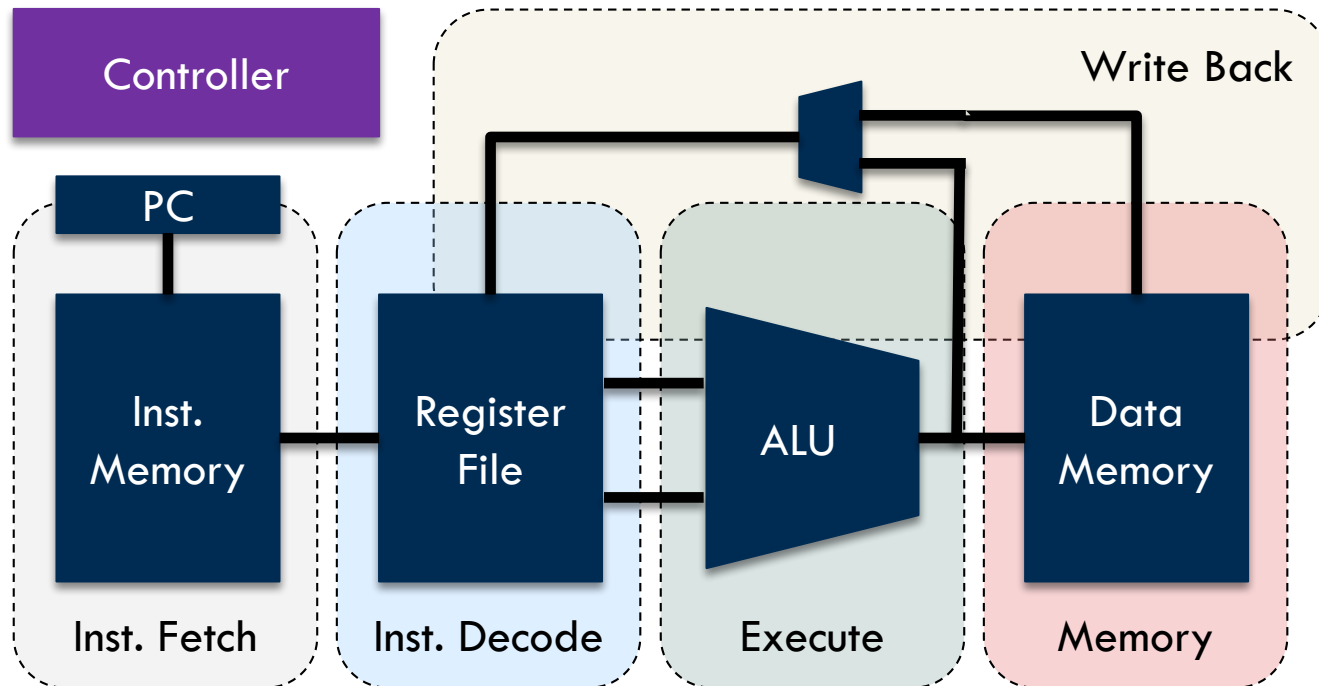

# Processing Instructions

- Every RISC instruction may require multiple processing steps
  - ▣ Instruction Fetch (IF)
  - ▣ Instruction Decode (ID)
  - ▣ Register Read (RR)
    - All instructions?
  - ▣ Execute Instructions (EXE)
  - ▣ Memory Access (MEM)
    - All instructions?
  - ▣ Register Write Back (WB)

# Single-cycle RISC Architecture

- Example: simple MIPS architecture
  - ▣ Critical path includes all of the processing steps

# Single-cycle RISC Architecture

- Example program

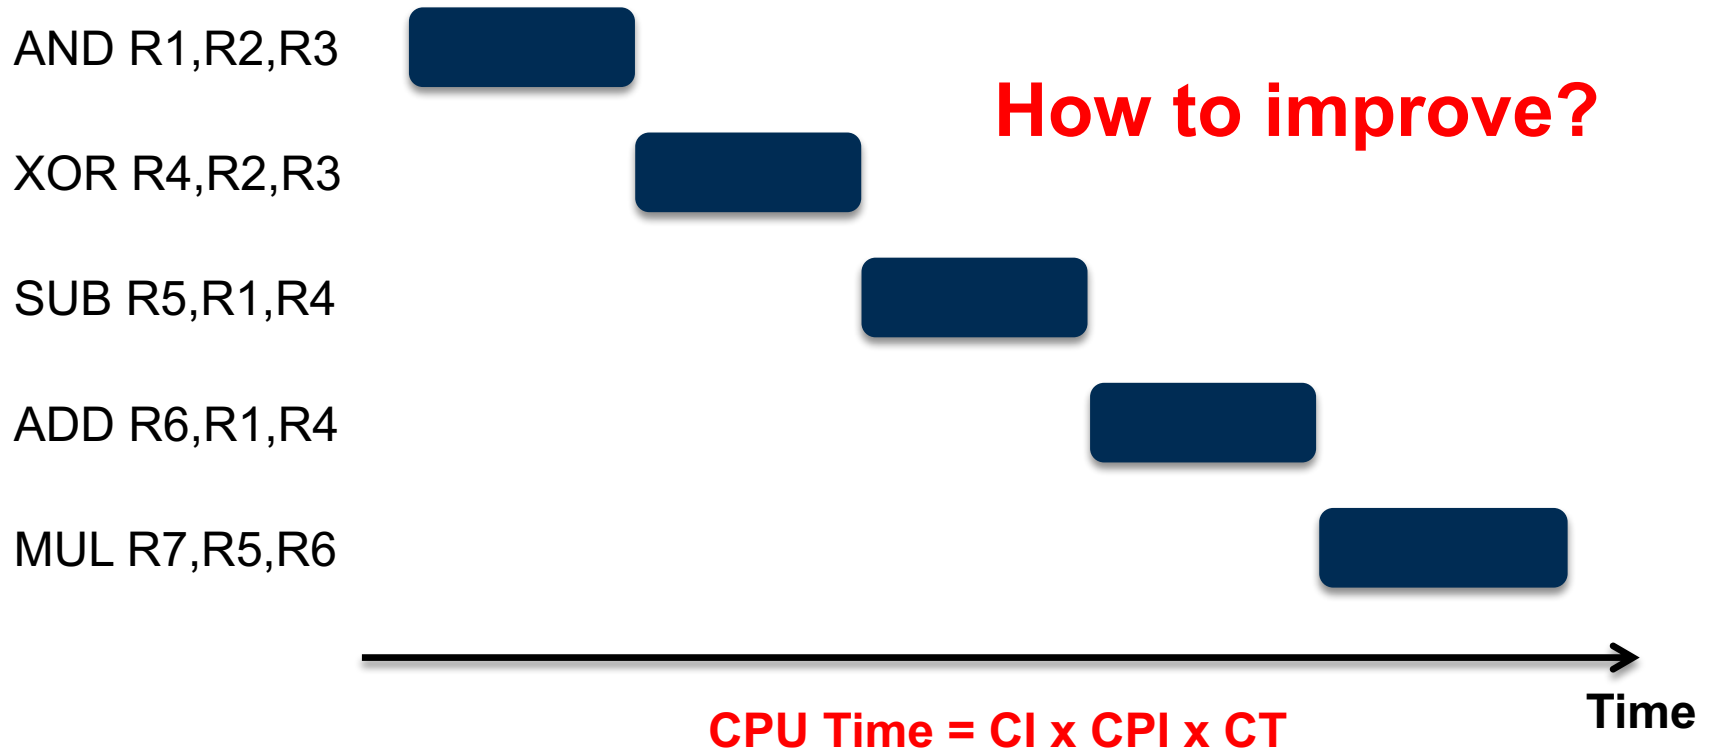

- ▣  $CT = 6\text{ns}$ ; CPU Time = ?

# Single-cycle RISC Architecture

- Example program

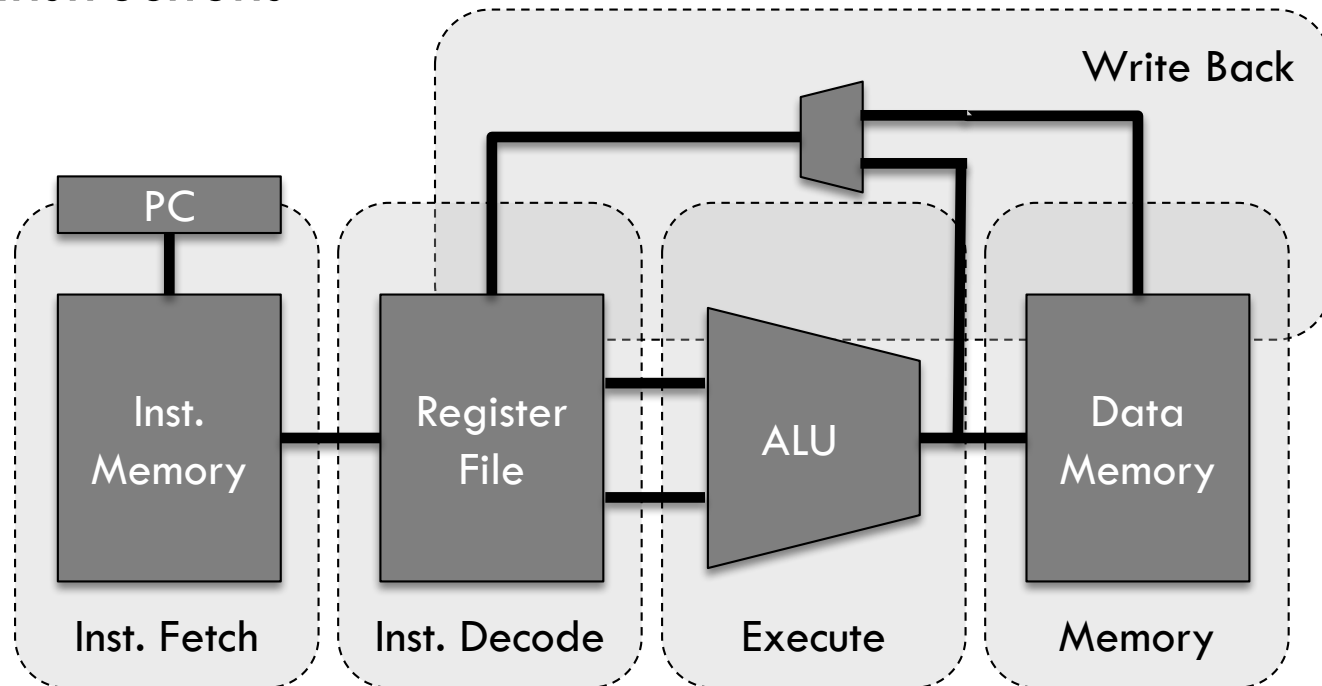

- ▣  $CT = 6ns$ ; CPU Time =  $5 \times 1 \times 6ns = 30ns$

# Reusing Idle Resources

- Each processing step finishes in a fraction of a cycle
  - ▣ Idle resources can be reused for processing next instructions

# Pipelined Architecture

- Five stage pipeline
  - ▣ Critical path determines the cycle time

# Pipelined Architecture

## □ Example program

▣  $CT = 1.5\text{ns}$ ; CPU Time = ?

# Pipelined Architecture

## □ Example program

▣  $CT = 1.5ns$ ; CPU Time =  $5 \times 5 \times 1.5ns = 37.5ns > 30ns$

**WORSE!!**

# Pipelined Architecture

## □ Example program

▣  $CT = 1.5\text{ns}$ ; CPU Time = ?

# Pipelined Architecture

## □ Example program

▣  $CT = 1.5ns$ ; CPU Time =  $5 \times 1 \times 1.5ns = 7.5ns$

# Pipelined Architecture

## □ Example program

▣  $CT = 1.5ns$ ; CPU Time =  $5 \times 1 \times 1.5ns = 7.5ns$

# Pipelined Architecture

## □ Example program

▣  $CT = 1.5ns$ ; CPU Time =  $5 \times 1 \times 1.5ns = 7.5ns$
